WHOLESALE MEMBER

Colbeck

Founded in 1893, Colbeck is the oldest independent wholesale supplier to the fish and chip market in the UK and they remain a family-owned and managed business. Ten per cent of the company is also owned by its Colleague Share Scheme. In 2023, it was awarded the inaugural National Federation of Fish Friers Supplier of the Year award at the National Fish & Chip Awards.

With two depots – one in Coatbridge and the other in Gateshead – Colbeck provides a minimum twice-weekly delivery service, comprising over 1,500 ambient and frozen products, to a wide range of food-to-go and fast-food caterers, as well as fish and chip shops. It also supplies food manufacturers and processors with bulk oil in IBCs and collect-and-process used cooking oils and fats.

“We are always interested in finding innovative items for the consumers of Scotland that can be delivered through our valued customers, so if you think our businesses would work together well then please do get in touch.”

Summer Harvest[®]

Cold Pressed Rapeseed Oil

SUPPLIER MEMBER

Summer Harvest Oil

Perthshire-based Summer Harvest Oil produces 100% natural high-quality cold pressed rapeseed oil, as well as dressings in Apple & Walnut, Bramble & Juniper, Chilli & Red Pepper, Lemon & Honey, and Raspberry variants, as well as Truffle Oil. All products are made without artificial colours or preservatives. Summer Harvest Oil grows all its own crops, and presses all its own oil on Ferneyfold Farm, 10 miles north of Gleneagles between Perth and Crieff.

Once harvested, the oilseed rape is taken to its on-site plant for cold pressing to release the oil, which is then triple filtered to remove the sediment and leave a pure, bright oil.

The production process includes a focus on zero waste and circularity, as the by-product – rapemeal – is fed to the cattle on the farm as part of a nutritious diet. The manure from the same cattle is then used as fertiliser for next year's crop.

“Our family have been farming these fields for over 130 years and we're proud of our heritage and delighted that we can bring a little bit of the rolling hills of Perthshire to your plate.”

Genius Brewing

Genius Brewing launched in 2018 with a mission to make healthier drinking a pleasure, not a compromise.

Brewed in Scotland, Gen!us IPA and Gen!us Craft Lager deliver the flavour, body, and 'feel good' of a real craft beer but at 3% ABV, making one can exactly one unit of alcohol. All Gen!us beers are vegan-accredited and low calorie – perfect for the ethical, health-conscious drinker but also those looking for a smart session beer. As fundraising partners of the My Name's Doddie Foundation, 5p from every beer goes to help Doddie Weir's vision of a world free of MND.

GEN!US[®]

CRAFT LAGER

Gen!us is available in draft (30L keg) and packaged (24 x 330ml cans). The brand sells on Amazon and Ocado, can be found in Scotland's best farm shops, and in hotels such as Cameron House.

"Recently, Genius Brewing partnered with Dunns Food and Drinks to build the brand across Scotland's on-trade but we are also keen to work with more Scottish wholesalers to extend our distribution across retail and food service."

ió fibrewater

SUPPLIER MEMBER

ió fibrewater

ió fibrewater – ió for short – was created to help consumers boost their fibre intake, increase hydration, and support gut health. As the UK's first functional water backed by science, including two university studies and two authorised health claims, every bottle of ió fibrewater delivers 20% of the recommended daily fibre intake and 100% of daily prebiotics intake.

Recent winner of a prestigious Scottish EDGE award and Best Drink Innovation winner at the 2023 World Food Innovation Awards, ió fibrewater is gaining more recognition as consumer interest in functional water continues to grow.

Made with only naturally sourced ingredients and non-HFSS with no added sugar and just 17 kcals per 500ml bottle, ió is currently available in two flavours – Lemon & Lime and Strawberry. The team also has plans to expand the range and introduce cans by Q3 2024.

“We joined the SWA to build relationships with wholesalers in Scotland to reach more consumers and ultimately help improve our nation’s health. Our scientific research has found that people who drink ió fibrewater experience incredible health benefits due to it being rich in prebiotics, from improved digestive health to improved sleep, mood, energy and more – plus the incredible importance of boosting fibre intake, too.”

RAER Spirits from Jackton Distillery

RAER Spirits, based at Jackton Distillery near Glasgow, while waiting for its Single Malt Scotch Whisky to mature, has launched the award-winning RAER Blended Scotch Whisky.

Our commitment to excellence extends beyond the distillery doors. At Jackton Distillery, we aspire to exemplify self-sufficiency, encompassing the entire journey from seed to sip. On the family farm, we meticulously plant selected seeds, nurture the fields with care, and harvest brilliant grain that will yield our liquid gold.

After our harvest has dried, RAER malts and mills its own barley. This step transforms our team into mini-microbiologists, allowing us to influence the microstructure of the barley kernels to create our unique taste. We mash our barley with pure Scottish water, cultivating full flavours through a lengthier fermentation process.

Distillation is then employed to carefully select and concentrate our desired profile, shaping the DNA fingerprint of our distinctive new make spirit. Each cask is meticulously chosen and filled with precision.

In carefully-curated single batches, our skilled production team also create our Great Taste Award winning Jackton Vodka, Jackton Rosé Gin, and our classic dry Jackton Gin. Our range of artisan spirits partners perfectly with our ethos of enabling everyone to 'Make Every Moment RAER'.

Winners of The Best Blended Scotch Whisky 2022 and 2023 - The Scottish Whisky Awards.

“We are delighted to join forces with our local, independent, family-owned distillery in Jackton. RAER is an excellent spirit partner for us, their delicious products have proven to be popular with our guests and their dedicated sales and marketing team are always happy to share their knowledge and expertise through distillery tours, training, providing cocktails recipes and digital assets for events and social media supporting our RAER cocktail showcasing. The family who own the distillery are very present in their business and work hard to better their local community and environment by planting thousands of trees in the vicinity and regularly volunteering and kickstarting community initiatives. Great people, great products. Highly recommend.”

St Andrews Bakery

St Andrews Bakery pride itself in tailoring its hospitality, foodservice and golf snacking solutions to its customers' needs. Its products include fudge, shortbread, biscuits and protein snacks.

Its brand-new Salted Caramel GOLF BALLS Protein Snack is a 45g grab bag containing six protein balls. The concept was developed with Masterchef Enrico Gusella to deliver a unique product that is an indulgent confectionery-like product in its taste and attributes, but yet has all the health benefits and claims of being 100% natural, a source of protein (the product contains 8g), and vitamin rich.

It contains no added sugar or artificial sweeteners, or palm oil, and is high in fibre, gluten free, vegan and Halal/ Kosher certified. It has an RRP of £1.50/bag and comes in a display outer containing 10 bags per case.

The GOLF BALLS Protein snack is the first in a new range and the brand already has some great partnerships and tie-ups with the likes of The Renaissance Club near Gullane, Gleneagles, The Old Course Hotel, Eden Mill, and Crieff Hydro to name a few.

“St Andrews Bakery are keen to talk to and partner up with two-three key wholesalers who can help us to further access the convenience, hospitality, food service and golf market.”

Twisted Hygiene

Twisted Hygiene & Packaging Ltd is a wholesale supplier of hygiene, packaging, janitorial and custom packaging products. Recently it has also expanded its operations, adding a desserts range including chocolates and spreads, and MONIN products.

From a small, family-run business with humble beginnings in 2011, it now has a permanent base in the southside of Glasgow with an expanding delivery network spanning across Scotland and North of England.

Its aim is to provide quality products at fair prices to all customers, big or small. It offers a next-day delivery service throughout Scotland and a customer care team who build a close relationship with business, to provide that personal touch and care.

The focus is now on pushing forward with goals to provide sustainable, environmentally-friendly packaging alternatives.

“We are working closely with our manufacturers to deliver the very best products. We are also leading the move away from single-use plastics to products which serve our customers and our environments better.”
